Grounds Maintenance

Grass cutting and maintenance of shrubbed areas to communal areas as detailed on site plan.

Grass clippings to be collected and removed from site as standard (exception may occur for verges/grass bank areas).

Lawn edges with paths/fences to be tidied and maintained.

Note: Large items of rubbish or quantities of animal excrement will be reported back to office. Gardeners are not expected to deal with bulky waste or waste that poses a biohazard.

Remove all self-set saplings from site wherever they occur.

Leaves and general litter to be removed from site and not allowed to gather on any part of the site that is marked for grounds maintenance. Where leaf blowers are used, all leaves and other light litter should be removed from site.

Where invasive weeds are found on site, to advise the NCHA and advise an appropriate course of action. Invasive weeds are considered to be those covered by various articles of UK legislation and also perennial plants that proliferate and dominate their environment causing problems to neighbours and structures ie. Russian Vine, Ivy, Bindweed etc.

Where Ivy is on site and established but not causing immediate problems, NCHA considers it to be managed as part of the contract to keep it from blocking windows, meter cupboards, doors, vents etc. All Ivy should be maintained at a height below 1.5m to ensure control and not requiring working at height.

Where it is possible to remove easily, remove it.

Where Ivy is becoming a problem ie. out of hand and encroaching on the fixtures and fittings of a building ie. upstairs windows, vents, guttering or affecting outbuildings, trees, fences etc and requires removing, please advise NCHA.

Seasonal Works - Grounds Maintenance

Spring: Lawn maintenance will resume, slowly at first and building up to twice monthly from April. Some works to shrubs and hedges to maintain access but areas may be missed where birds are nesting (legal requirement). Hard surface swept on each visit and treatment for weeds will begin mid Spring.

Summer: Lawn maintenance is twice monthly. Works to shrubs and hedges will be carried out but again, areas may be missed where there are nesting birds. Hard surface areas swept on each visit and treatment for weeds on monthly basis. Aggressive species of plants - invasive weeds - will be treated during this growing season.

Autumn: Lawn maintenance will reduce in line with vigour of lawn growth and stop in November. Shrubs, hedges and trees will be cut back in readiness for next year. Hard surfaced areas swept on each visit, light litter picked on each visit but weed treatment will stop after September.

Winter: Maintain general tidiness of site including litter picking for light litter. Any major works to trees will take place at this time, as well as replacement of dead/damaged shrubs and turf.

General: Please contact the office or Communalservices@ncha.org.uk directly if you are concerned about a tree or invasive species of plant. Please take pictures from several angles and attach them to your email.

Futher & Additional Information

Please treat contractors with due courtesy.

If you have any questions about service provision, please contact this office on 0800 0138 555 or Communalservices@ncha.org.uk and we will be happy to help.
